Re: Septic Tank Management
Block: 18017 ;Lot 16

Dear Ms. Nevins:

Your septic system is included in the Board of Health's septic management district and requires Board of Health licensing and inspections every three years. On August 22, 2000, an inspection of your system was conducted by a Health Department representative. During this inspection, the inspection ports of your septic bed could not be located.

Your septic system design required that inspection ports be installed to assist in the monitoring of your system. Our next inspection will be within three years of the date of this letter. We request that the ports be found prior to our next inspection.

Enclosed please find a copy of your septic design showing where the missing ports should be located. If you find the ports, please put a marker indicating the location and call our office for a reinspection.

If you have any questions or concerns, please contact this office at the above telephone number or address.

Sincerely,

Kristen Mahan
